

# MCLC NEWS

Work ready students have been working at Boneham Cottages to erect a carport. This is one of the many community volunteer projects that these students will be doing over the coming months to build their skills in the trades industry. Local builder Neil Reilly facilitates this program which enables our students to learn the

skills necessary to work in the labouring industry, including dress code, work ethic, appropriate behaviour and acceptable verbal and nonverbal communication. Students graduate from this course as confident and skilled young people that are ready for the workforce.

Meika's Health class went to the Millicent Library to enjoy a virtual reality experience and learn more about what is available and how they can access the resources. The incidental learning included relationship building with each other and staff as well as making links into the community. The

content of this program has a strong emphasis on wellbeing and healthy living habits. Students enjoyed a fruit salad for lunch that was donated by Mount Gambier Food Bank, a great opportunity to discuss healthy eating habits and good food choices.

Stage 1 Construction students have been building an 80 meter high climbing wall at Noorla Yo Long under the guidance of teacher Brett Loader. This project has been an amazing opportunity for students to work on a very large scale project, learning the process of planning and approvals. This week the students were challenged with strategically placing the climbing holds onto the board and securing them, it was fantastic to see the students working productively as a team.
