School Assistant Workshop

Supporting PRIMARY Students in Mathematical Development

Bronwyn Waldeck

Manager of Middle School Additional Learning

Bronwyn has been working for over twenty years in Primary education. She has worked throughout the primary school and currently manages the Middle School Additional Learning Department at Kings Baptist Grammar School. Her role allows her to work with students from Year one through to Year 9. Bronwyn's particular passion is in the area of numeracy. She runs a maths recovery program at her school, writes individual maths program's for ESO's to follow and use and supports teachers in a mathematical context. Seeing the "light bulb" moments in the eyes of children who struggle with mathematics is one of the greatest joys she has. Knowing that we can connect students with the maths curriculum, regardless of the level, is a positive and wonderful challenge.

The following will be the foci for this workshop:

- Exploring a developmental continuum for the concepts of place value, counting, addition and subtraction
- Engaging in practical activities that relate to place value, counting, addition and subtraction that can be used and adapted for students working at a variety of levels
- Developing effective questioning techniques and strategies to help students move along in mathematical understanding.

Date: Tuesday 17 November 2015

Time: 9.00am – 12.30pm

Tea & coffee on arrival, morning tea provided

Cost: \$70 GST Exclusive

Registration from 8.30am

Venue: Education Development Centre (EDC)

Milner St, Hindmarsh
