Millicent High School Applications

Here at Millicent High School, we have established the uses of different applications to help our students, staff, parents/caregivers and the wider community to communicate.

Google Classroom:

The Google Education Suite is a web based environment that allows students and teachers to collaborate, present and research effectively. Google Classroom is a digital platform that enables teachers to set assignments, give feedback and support students in their learning.

Google Drive – A tool that gives students the power to create documents, presentations and spread sheets in collaboration with peers.

Google Classroom – A digital platform for teachers to set assignments, give feedback and support learning.

Third Party Extensions – These are applications that support learning through the cloud but are not owned by Google. They will be tested and monitored by the school proxy servers for security purposes before use.

This secure online environment can be accessed by any students anywhere and at any time, making the transition into out of school learning more user friendly. The Google Suite for Education does not require a specific device, only internet access to be used. The aim of the Google Suite is to allow students to connect with their learning locally, and with schools around the area in a safe and school monitored environment.

Sentral Parents App:

The Sentral Parents App is currently used by MHS to communicate with parents. Student timetables, Absences, Interviews, Students Reports, the Principal's Report and events, can all be accessed via the Parents App. Teachers can also be communicated with directly. Sentral provides a quicker and more accessible method of communication between the school and the school community. Parent codes will be emailed to Parents once they have been created.

If you haven't already downloaded the App, we invite and encourage that you download it as soon as possible as this is our preferred method of communication.

Please find attached simple instructions on how to download the *Sentral App for Parents* on your iPhone or Android devices.

QKR App:

QKR with Masterpass is an application for iOS or Android devices that allows customers to pay for items such as school lunch orders, school fees or excursions directly from their smart phone. It can be downloaded from your phone's app store.

Yours sincerely,

Peter Duncan
Business Manager

Todd Watson
Principal
